Journal of Fluid Mechanics **Volume 339 25 May 1997**

I. Rampall, J. R. Smart & D. T. Leighton The influence of surface roughness on the particle-pair distribution function of dilute suspensions of non-colloidal spheres in simple shear flow *page* 1

B. Cuenot, J. Magnaudet & B. Spennato The effects of slightly soluble surfactants on the flow around a spherical bubble 25

W. O. Criminale, T. L. Jackson, D. G. Lasseigne & R. D. Joslin Perturbation dynamics in viscous channel flows 55

K. J. Zwick, P. S. Ayyaswamy & I. M. Cohen Oscillatory enhancement of the squeezing flow of yield stress fluids: a novel experimental result 77

M. Short & J. J. Quirk On the nonlinear stability and detonability limit of a detonation wave for a model three-step chain-branching reaction 89

K. Bajer & H. K. Moffatt On the effect of a central vortex on a stretched magnetic flux tube 121

M. S. Carvalho & L. E. Scriven Deformable roll coating flows: steady state and linear perturbation analysis 143

M. E. Bastin & P. L. Read A laboratory study of baroclinic waves and turbulence in an internally heated rotating fluid annulus with sloping endwalls 173

R. S. Heeg & N. Riley Simulations of the formation of an axisymmetric vortex ring 199

S. Séror, D. E. Zeitoun, J.-Ph. Brazier & E. Schall Asymptotic defect boundary layer theory applied to thermochemical non-equilibrium hypersonic flows 213

B. M. Woodley & N. Peake Global linear stability analysis of thin aerofoil wakes 239

L. d'Agostino, F. d'Auria & C. E. Brennen On the inviscid stability of parallel bubbly flows 261

D. T. Walker On the origin of the 'surface current' in turbulent free-surface flows 275

A. Noullez, G. Wallace, W. Lempert, R. B. Miles & U. Frisch Transverse velocity increments in turbulent flow using the RELIEF technique 287

H. D. Maniar & J. N. Newman Wave diffraction by a long array of cylinders 309

D. V. Evans & R. Porter Trapped modes about multiple cylinders in a channel 331

B. Vremen, B. Geurts & H. Kuerten Large-eddy simulation of the turbulent mixing layer 357

J. Pedlosky, J. A. Whitehead & G. Veitch Thermally driven motions in a rotating stratified fluid: theory and experiment 391
